

LASER CUTTING RULES

If you have any questions about these rules or need assistance with preparing your drawings, contact us at LimaLabLaser@gmail.com.

- **No walk-in laser cutting.** If you need laser cutting, schedule an appointment with any of the operators **at least 24 hours** in advance.
- Laser cutting appointments are limited by default to 1 hour per day per project. Longer appointments may be scheduled in advance by request.
- Drawings should be **fully prepared** in the laser template file prior to your appointment. Instructions are available in the [LaserCutter FAQ](#) at dap.cooper.edu. We may turn down appointments for projects that are not ready.
- If you use lab scrap materials, select your piece of material and arrange your drawing to fit on this piece of material as efficiently as possible **prior to your appointment.**
- You may only use the laser cutter computer under direct supervision of an approved laser cutter operator. **Do not use the laser cutter computer to finish your work;** use the computer center or your own computer.
